DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to an information storage and playback device with delivery system, classified in class 709, subclass 231.
 - II. Claims 1, 23-27, drawn to a business accounting method, classified in class 705, subclass 30.
2. Claim 23 is in improper form because a multiple dependent claim should refer to other claims in the alternative form only. See MPEP § 608.01(n). For purposes of this restriction, Examiner is treating claim 23 as being dependent upon claim 1.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the device strictly deals with downloading information on demand. The subcombination has separate utility such as a financial accounting method for downloading data.
4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Howard Bernstein on December 6, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
